

ACI World Safety and Technical Standing Committee welcomes Arie van der Eijk

As of July 2016, To70 will be a World Business Partner for the ACI World Safety and Technical Standing Committee. Arie van der Eijk will be the representative for To70 in this committee.

The ACI World Safety and Technical Standing Committee consists of airport and industry members with specific knowledge and expertise in areas relevant to airports and the aviation industry. The committee covers, for instance, airport planning, design and development, airspace and airport capacity, aircraft/airport compatibility issues, safety management and aerodrome emergency planning.

Role within the committee

Representing To70, Arie will be one of the five non-airport members of the committee.

It's my pleasure to join this committee, and I hope I can make a valuable contribution to the safety and efficiency of airports worldwide.

The first meeting will be October 11-13 in Montreal.

To70's third committee role at ACI

Arie's membership of the ACI World Safety and Technical Standing Committee is now the third committee at ACI where To70 takes part. Managing director Ruud Ummels has a seat in the ACI Europe Environmental Committee, and senior aviation consultant Adrian Young is a member of the ACI Europe Technical & Operational Safety Committee.

About To70

To70 was founded in The Netherlands in 2000 and has since expanded with offices in Europe, Australia, Asia and Latin-America. Our clients include airports, airlines, governments and air navigation service providers. At to70 we believe that society's demand for transport and mobility can be met in a safe, efficient, environmentally friendly and economically viable manner. To achieve this, policy and business decisions have to be based on objective information. With our diverse team of specialists and generalists to70 provides pragmatic solutions and expert advice, based on high-quality data-driven analyses.
