

### **Do you want to become a top consultant in aviation?**

To70 delivers high-quality consulting and research services to the global aviation community. With our services, we help aviation and society meet current and future challenges in airport and airspace operations. Since our establishment more than 15 years ago, we have built a reputation on integrity, drive, knowledge and innovation.

To70's experts have extensive experience in the aviation sector. Our experts are renowned for their lateral thinking resulting in innovative and cost effective outcomes. Together with clients, To70 works to provide independent advice, helping them identify and analyse problems, recommending solutions and assisting with their subsequent implementation.

Our wide range of customers includes airports, airlines, government bodies, research institutions and air navigation service providers. These organisations all face the challenges associated with accommodating the growing demands of air traffic and integrating their operations with the environment. Our dedicated team of professionals display an unremitting drive to create practical solutions.

To grow our team in Australia, we're looking for enthusiastic, self-motivated, driven individuals with strong written, verbal and graphic communication skills.

### **Senior Aviation Consultant**

The successful candidate will be part of our strong team delivering exceptional outcomes for our customers, whilst nurturing and driving business growth opportunities across the Asia Pacific region and beyond.

#### *Your function and responsibilities*

- You're driving growth in our business by securing business leads and delivering consistent and excellent outcomes for our clients.
- You're working in project teams to guide or support team members, conducting analyses and preparing project deliverables and objectives.
- You're analysing and studying safety, capacity and the environment.
- You're working on the optimisation of airspace and airport operations.
- You report and present your results.
- You formulate recommendations.
- You're in contact with our clients and provide on-site client support.
- You plan and organise your own tasks.

### *Your profile*

You are:

- experienced, with a minimum of five (5) years of progressively increasing responsibility in the field of aviation, e.g. as a consultant or working for an airport, ideally with understanding of business development and people management.
- tertiary educated or have significant field experience. in a relevant field (e.g. aviation/aeronautics/aerospace, operations research, statistics, analytics, or mathematics)
- ambitious and desire to progress your career and build the To70 brand in Australia.
- experienced in one or more of the following;
  - Delivering Master Plans or components required under the Airports Act (1996),
  - Airport terminal planning and terminal operations,
  - Airport/Airfield operations, compliance and safety management
  - Infrastructure development and/or land use planning,
  - Route development, airline and airport economics.
- someone who enjoys working with others and growing a professional network.
- able to communicate and express yourself clearly, in oral and written forms.
- curious, critical and innovative.
- a citizen or permanent resident of Australia or a New Zealand citizen.
- willing to travel to our offices and those of our clients and you may be required to work on location on a periodic basis.

### *We offer*

A salary and contract that match the function of your role and your experience.

Remote working arrangements
