

Aviation Safety Risk Management Workshop

May 21 2018, Bangkok - Thailand

And aligned 2-day BowTieXP Training on May 22-23

Are you in control of your daily operations? Risks can only be managed when completely understood. By means of a barrier based approach, complex risks can be visualized in a way that is understandable. To70, Harbottle Hughes and CGE Risk Management Solutions cordially invite you to attend the upcoming Aviation Event in Bangkok, Thailand. A perfect way to learn more about barrier based risk management.

Event topics

During this complimentary event you will be introduced to barrier based risk management. A number of interesting speakers will share their experiences with you during plenary sessions. We will also cover how the bowtie method, using the BowTieXP software, can aid the assessment and management of risk. Interested to learn about the next steps are? We will briefly explain how to link your incident analysis results back to your risk assessment with IncidentXP and how to monitor your barrier performance with AuditXP. You will be very welcome to share your views and experiences during this event as well.

Join us at this informative day to learn more about barrier based risk management with help of the bowtie method and BowTieXP software.

Registration
